

PROFESSIONAL SERVICES FOR FORESCOUT

Brite's team of experts helps organizations
realize the full value of ForeScout

The Challenge

When it comes to securing the enterprise in the age of BYOD, IoT and operational technologies (OT), the Forescout platform is key. But how you optimize it depends on your specific operational and architectural needs.

You may want to deploy the Forescout platform simply to make devices visible as they access your network to provide real-time network intelligence to your Security Operations Center. You may want to go one step further to provide both visibility AND apply granular security controls for devices and endpoints.

You may also want to leverage Forescout eyeExtend products to share information with other security technologies in your environment. With eyeExtend, you can obtain continuous monitoring and automated remediation across your extended enterprise.

With so many capabilities and choices available, it can be a challenge to confidently select the best way to customize and optimize the Forescout platform for your specific environment.

The Solution

Brite's Professional Services for Forescout

Brite's Professional Services team helps you design, plan, deploy and optimize the solution that works best for you. Based on hundreds of actual deployments, our expert engineers guide you through the design decision-making process, explain the many ways our products are leveraged by real-world customers and establish a practical roadmap to obtain the full value from your Forescout implementation.

Our certified Forescout engineers can help you leverage complete device visibility and continuous situational awareness to solve your toughest use cases with deep, real-world experience in network access control, device compliance, network segmentation, asset management and incident response. We provide packaged and custom services that range from simple, one-time consultations to ongoing, comprehensive engagements that span the entire installation lifecycle (including deployment, configuration, training, health checks and upgrades).

BENEFITS

Maximize the ROI of your Forescout platform and other security tools

- Increase security operations/help desk productivity and harmonize cross-group collaboration
- Automate policy-based controls to ensure and demonstrate security compliance
- Accelerate response to security incidents and breaches through automation and improved staff proficiency
- Confidently embrace future use cases and capabilities

DERIVING MAXIMUM VALUE WITH ENHANCED PROFESSIONAL SERVICES FOR FORESCOUT

The Forescout platform provides comprehensive device visibility and automated control to effectively manage cyber, operational and compliance risks while increasing security operations productivity.

Brite developed Enhanced Professional Services (EPS) for Forescout to maximize the capabilities, (and Forescout has endless capabilities). Brite's certified Forescout engineers and project management team lead your organization through a 12 month journey. Broken down into 4 main phases that start with visibility and ends with compliance.

1. Visibility and Classification of the network connected devices

2. Clarification (corporate vs non-corporate) of the connected devices

3. Control and Automation of devices through co-develop policies (allow, deny, quarantine, isolate, vlan, etc). Automation may include orchestration with existing security tools.

4. Display real-time and measure overtime, device compliance compared to requirements (provided in detailed reports and dashboard)

ENSURE PEAK PERFORMANCE WITH A HEALTH CHECK FOR FORESCOUT & 8.2 READINESS ASSESSMENT

Many tools fall subject to set it and forget it. Even if the tool is used every day, it is necessary to take a step back and analyze the configuration. The Health Check for Forescout will do just that. In 2 hours, Brite's certified engineers systematically assess your environment and ensure optimal configuration.

At the conclusion of the Health Check, Brite will provide a comprehensive read out report with detailed findings and appropriate recommendations.

In addition, Brite's Health Check for Forescout will prepare your organization for the 8.2 upgrade.

Areas of Assessment

- Assess policies
(classification, clarification, compliance and control)
- Identification of unmanaged devices
- Use case mapping
- Appliance review
- Plugin review
- Validation of proper backup schedule

GET A HELPING HAND WITH DEPLOYMENT PROJECTS FOR FORESCOUT

Brite delivers effective, reliable service deployment projects for Forescout. Brite's experienced engineers and project management team provide a proven process to quickly deploy Forescout components as intended. With Brite, you can be certain that your Forescout environment is operating as intended.

Visibility

Brite's Visibility Pack is a set of standard procedures that shorten the time to true visibility of all devices (including managed and unmanaged) through the following:

- Planning and design services
- Forescout eyeSight configuration, policies, and plugins

Once complete, organizations see the value of this powerful visibility tool, quickly.

Enforcement

Brite's Enforcement Pack enable enforcement through:

- Planning and design services
- Resolving unknown/unmanaged devices
- Creating/adjusting policies for action, clarification, and compliance
- Developing repeatable strategy for additional sites or segment to full enforcement
- Assisting in the development of an in-house Forescout Triage Team

Once complete, organizations can be confident that their policies are being properly enforced with minimal impact to daily user workflows.

Module Deployment

Brite's Module Deployment projects assist customers to implement a bidirectional connection with new and existing security tools. Some examples of these tools include:

- CMDB and Ticketing: ServiceNow
- Endpoint: CrowdStrike
- Network: Palo Alto, Check Point
- SIEM: QRadar, Splunk
- VM: Rapid7, Tenable, Qualys

Post deployment, organizations can gain additional value through true automation.

#THEBRITEADVANTAGE

Technology and people are at the core of everything we do. Brite is committed to proactively protecting communities and organizations through innovative technology solutions delivered by our talented team. We recommend thoroughly evaluated industry-leading technologies and pair them with proven processes to assist our clients in effectively achieving their goals and objectives.

At Brite, **good enough is never enough.**
