

ADVANCED SECURITY SPOTLIGHT

Go beyond BriteStar's standard cyber security services and utilize Brite's 24/7 SOC services to alert, prevent and respond to today's most advanced threats. The daily task of monitoring, managing and responding to alerts leads to missed critical events and employee fatigue. Together, Brite's people, process and technology deliver a superior results without the burden of tactical, daily management.

FEATURED SOLUTIONS

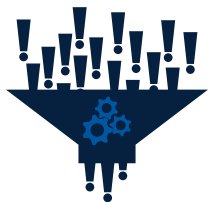

ADVANCED THREAT DETECTION

Known and unknown threats originate from both inside and outside the organization. Brite's threat team gathers threat intelligence by configuring the IPS/IDS to protect against known threats and bad actors. Known vulnerabilities are eliminated through proactive vulnerability scanning, remediation and strategic patching. User behavior is learned and anomalies generate alerts and automated remediations to stop attacks immediately.

Components

- Threat intelligence
- Intrusion Detection/Prevention
- Threat Detection and Response
- User Behavior Analysis
