Mortgage lending partner signs with Brite

Rochester, NY - November 12, 2019: Brite is pleased to announce that it has added a mortgage lending partner to its BriteProtect managed security services portfolio. BriteProtect is a complete managed security service that includes a 24/7 Security Operations Center (SOC) and Security Incident and Event Management (SIEM) platform.

Due to the sensitive, personal information involved with lending practices, financial organizations undergo both periodic and unplanned audits to ensure they are implementing proper information technology tools to protect client and corporate information. Audits often highlight the need for a SIEM to activity monitor activity, protect client information and comply with regulations.

The firm's SVP of Information Technology said, "The audit report called out the need for aggregation and active monitoring of our alerts. Due to the size of our company and IT team, we did not have the resources internally to deploy and manage a traditional SIEM necessary to meet the audit recommendation, especially not 24/7 monitoring. BriteProtect was able to soundly secure our company by the needed deadline with a comprehensive service."

David D'Agostino, VP of Operations commented, "Every day that an organization is not actively monitoring alerts is a day that a catastrophic breach can happen and go unnoticed, leading to gross amounts of lost personal data. With BriteProtect's proven combination of people, process and technology, we can get our customers monitoring and alerting in 30-60 days, not months like traditional SIEM solutions."

About BriteProtect

BriteProtect is a managed security service offering designed to help companies outsource critical, repetitive and tactical elements of the IT departments. The full-service managed SIEM service offers a sound methodology involving people, process and technology to proactively monitor potential attacks. Playbooks, developed through experience, define the response process and deliver a predictable response when incidents do occur. With BriteProtect, organizations of all sizes can proactively manage security alerts.

About Brite

People and technology are at the core of everything we do. The Brite team is committed to proactively protecting communities and organizations through innovative technology solutions delivered by our talented team. We recommend thoroughly evaluated industry-leading technologies and pair them with proven processes to assist our clients in effectively achieving their goals and objectives. At Brite, **good enough is never enough.**
