Brite Partners with Netskope

Rochester, NY - February 17, 2020: Brite is pleased to announce its latest cyber security partner, Netskope. Netskope data-centric approach focuses on supporting organization's digital transformation journeys through cloud security.

The continued digital adoption has dissolved traditional network perimeters, resulting in unprotected networks and data. This transition makes it more challenging to control and protect data in the cloud. Netskope's data forward solution prioritizes securing the network at all locations without disrupting business operations.

Brite understands the importance of a complete and unified security approach and incorporates that mindset when evaluating new partners. As the digital transformation continues, it's important to prioritize protecting data at all locations, but to also implement proper tools that complement existing security solutions.

Trevor Smith, VP of Sales and Marketing commented, "Understanding where your data lives and how it moves across the network is one of the first steps in protecting this new network. We always say, visibility into your network is essential in securing protecting the entire environment. We're confident that Netskope's platform brings the right combination of visibility and security to protecting cloud environments."

About Brite

People and technology are at the core of everything we do. The Brite team is committed to proactively protecting communities and organizations through innovative technology solutions delivered by our talented team. We recommend thoroughly evaluated industry-leading technologies and pair them with proven processes to assist our clients in effectively achieving their goals and objectives.

At Brite, **good enough is never enough.**

About Netskope

The Netskope security cloud provides unrivaled visibility and real-time data and threat protection when accessing cloud services, websites, and private apps from anywhere, on any device. Only Netskope understands the cloud and delivers data-centric security from one of the world's largest and fastest security networks, empowering the largest organizations in the world with the right balance of protection and speed they need to enable business velocity and secure their digital transformation journey. Reimagine your perimeter with Netskope.
