AeroDefense
RELIABLE DRONE DETECTION

AirWarden™ Key features

✓ **First** and **only** drone detection product to be on Department of Homeland Security SAFETY Act of 2002 approved technologies list
- Full liability protection available for end-users of technology

✓ Detects all known & unknown drones regardless of make/model (even home-made kit drones) based on physical radio frequency (RF) signal characteristics

✓ Can detect DJI drones
- With HW/SW/GPS info sharing turned off or on in the DJI Pilot App privacy settings
- With DJI or 3rd party controller

- Detects & locates both drone & controller (pilot) simultaneously using RF sensors
- Legal RF detection that does not decode or demodulate signals (US Wiretapping Laws not violated)
- Single sensor type for detection & location
- Production deployments in heavy RF traffic environments ensure high reliability
- Not International Traffic in Arms Regulations (ITAR) restricted
- Not affected by drone/controller signal encryption
- Not affected by GPS spoofers
- Line of sight not required
- Monitors 400/900 MHz & 2.4/5.8 GHz bands

We detect top drone manufacturers:

DJI   Parrot   Autel   Yuneec   **and many more**
