

COMPLETE MOBILE TECHNOLOGY

Let Brite guide you through a complete in-vehicle set up. Brite delivers safe, ergonomic mobile workspaces for first responders that include everything from MDTs and mounting to video and e-ticketing. Brite has over 20 years of experience outfitting all types of public safety vehicles including cars, SUVs, firetrucks and ambulances.

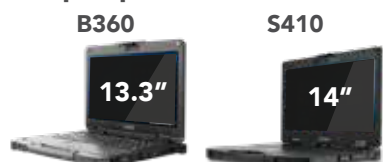

COMPUTERS

Getac Brite specializes in providing safe, ergonomic and cost-effective MDT solutions. Our in-vehicle computing technology meets the demands of today's first responders. We are proud to offer a wide variety of devices, both rugged and semi-rugged.

AUTOMATIC VEHICLE LOCATION SYSTEM

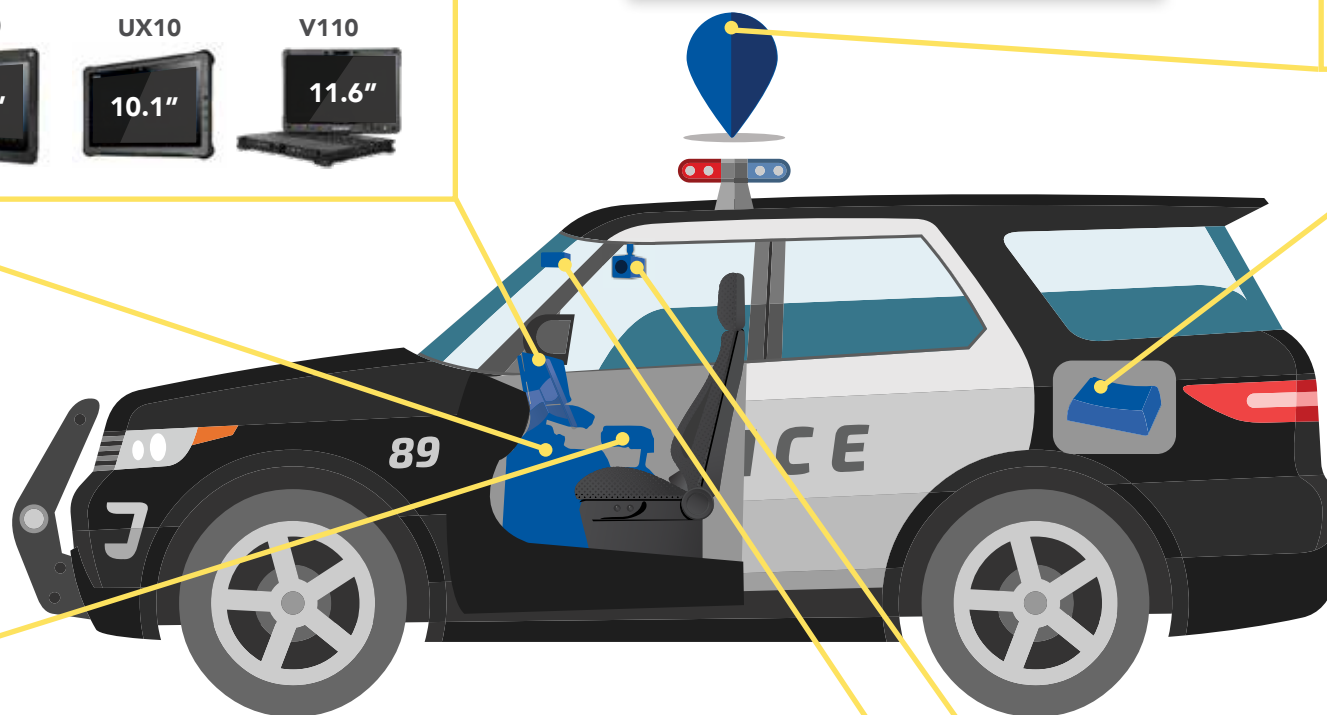

Improve officer safety and fleet tracking with an Automatic Vehicle Location System (AVLS). Know where patrol vehicles are at all times and rapidly send support to escalating situations. Additionally, fleet management provides monitoring and management of all vehicles and assets.

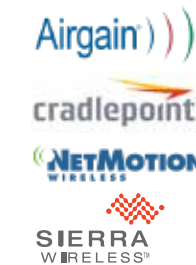

MOUNTING

Ensuring officer safety, developing ergonomic computing environments and reducing the total footprint of all vehicle configurations is Brite's specialty. From swing-aways to clamshells and dash mounts, we can meet all your mounting needs with innovative, industry proven solutions.

CONNECTIVITY

Today's in-vehicle technologies require a stable, reliable internet connection. Brite's communication product line-up empowers departments to take advantage of FirstNet and Band 14 technology where available. Our certified engineers provide essential deployment, configuration and training services.

E-TICKETING TOOLS

Upgrade your ticketing system with the latest e-ticketing printers and scanners. The newest printers are compact and capable of printing sharp text, crisp graphics and high-quality documents. Utilize scanners to capture driver licenses, registration and other forms quickly and error-free.

ADVANCED LICENSE PLATE AND VEHICLE RECOGNITION

The most accurate LPR and vehicle recognition on the market, powered by artificial intelligence.

VIDEO SOLUTIONS

The powerful combination of in-car and body-worn cameras provide law enforcement with tangible evidence for investigations while tracking officer movement to improve safety. Brite's partner delivers cutting edge camera technology and an integrated digital evidence system with redaction software. The end result is consolidated footage from in-car and body-worn streams into one evidence record.

In-Car Video

- Small profile with wide angles
- Powerful Windows based DVR
- Both on-premise and cloud evidence management options

Body-Worn Camera

- Panoramic, full HD video (even in low-light conditions)
- Small and light form factor
- Up to 12 hours of battery life
- Wide range of communication (Wi-Fi, Bluetooth, GPS, LTE)
