

# Brite

**THE LEADER IN PUBLIC SAFETY  
TECHNOLOGY INTEGRATION**

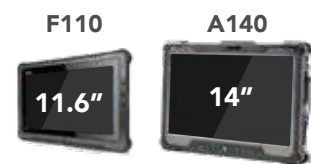

# COMPLETE MOBILE TECHNOLOGY

Let Brite guide you through a complete in-vehicle set up. Brite delivers safe, ergonomic mobile workspaces for first responders that include everything from MDTs and mounting to video and e-ticketing. Brite has over 20 years of experience outfitting all types of public safety vehicles including cars, SUVs, firetrucks and ambulances.

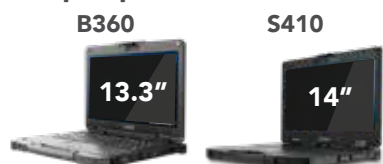

## COMPUTERS

**Getac** Brite specializes in providing safe, ergonomic and cost-effective MDT solutions. Our in-vehicle computing technology meets the demands of today's first responders. We are proud to offer a wide variety of devices, both rugged and semi-rugged.

### Tablets

### Laptops

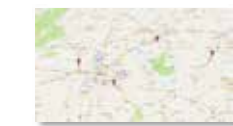

### Convertibles & 2-in-1s

## AUTOMATIC VEHICLE LOCATION SYSTEM

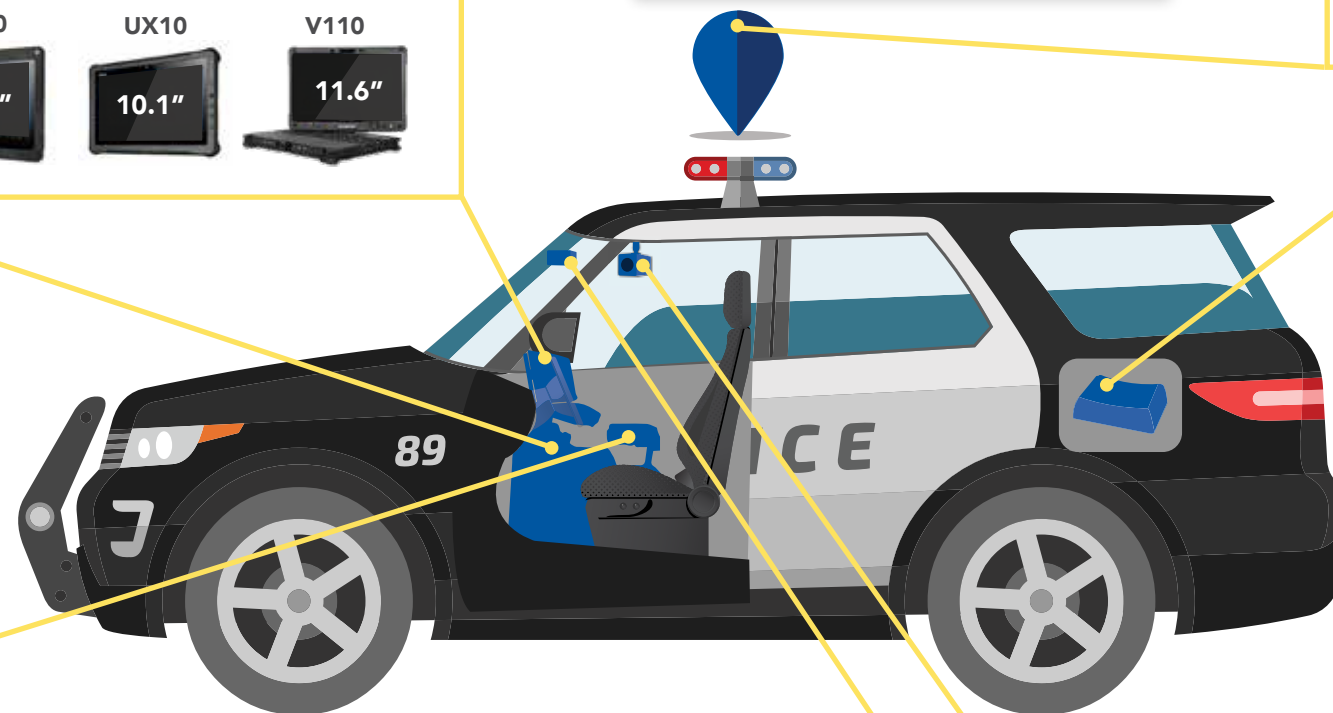

Improve officer safety and fleet tracking with an Automatic Vehicle Location System (AVLS). Know where patrol vehicles are at all times and rapidly send support to escalating situations. Additionally, fleet management provides monitoring and management of all vehicles and assets.

## MOUNTING

Ensuring officer safety, developing ergonomic computing environments and reducing the total footprint of all vehicle configurations is Brite's specialty. From swing-aways to clamshells and dash mounts, we can meet all your mounting needs with innovative, industry proven solutions.

## CONNECTIVITY

Today's in-vehicle technologies require a stable, reliable internet connection. Brite's communication product line-up empowers departments to take advantage of FirstNet and Band 14 technology where available. Our certified engineers provide essential deployment, configuration and training services.

## E-TICKETING TOOLS

Upgrade your ticketing system with the latest e-ticketing printers and scanners. The newest printers are compact and capable of printing sharp text, crisp graphics and high-quality documents. Utilize scanners to capture driver licenses, registration and other forms quickly and error-free.

## ADVANCED LICENSE PLATE AND VEHICLE RECOGNITION

The most accurate LPR and vehicle recognition on the market, powered by artificial intelligence.

## VIDEO SOLUTIONS

The powerful combination of in-car and body-worn cameras provide law enforcement with tangible evidence for investigations while tracking officer movement to improve safety. Brite's partner delivers cutting edge camera technology and an integrated digital evidence system with redaction software. The end result is consolidated footage from in-car and body-worn streams into one evidence record.

### In-Car Video

- Small profile with wide angles
- Powerful Windows based DVR
- Both on-premise and cloud evidence management options

### Body-Worn Camera

- Panoramic, full HD video (even in low-light conditions)
- Small and light form factor
- Up to 12 hours of battery life
- Wide range of communication (Wi-Fi, Bluetooth, GPS, LTE)

# INVESTIGATIONS & REAL TIME CRIME CENTERS

Utilize the latest in public safety technology to find leads faster and proactively protect communities. By understanding our customers' need for next-gen policing technology, Brite has gathered a full suite of intelligence tools to improve officer safety and productivity.

## DRONE DEFENSE

Drones can be a toy, asset or a threat. AeroDefense's advanced drone detection system identifies and classifies radio frequency (RF) drone and controller signatures and uses these signals to locate both devices to secure sensitive locations with ease.

## LICENSE PLATE RECOGNITION

Rekor's innovative AI based LPR software technology provides over 99% accuracy on plate read, multi-lane coverage, situational scan awareness and make, model and color search, making it the most accurate plate recognition on the market. Without the constraints of proprietary cameras and the industry's best warranty, departments can expand LPR deployments and better protect communities at a lower total cost of ownership.

## VIDEO INTELLIGENCE

Utilize BriefCam to leverage existing video assets and save resources by analyzing hours of video in minutes. Agencies can cut out the noise through advanced filtering and focus on the target to solve crimes faster. Additionally, get real-time notifications of pre-set safety, security and operational events.

## SITUATIONAL AWARENESS

Gain a holistic real-time visualization of all disparate feeds in a single, interactive map with Live Earth. The visual operations platform provides actionable intelligence during critical incidents. Post event, recreate incidents as they occurred to better assess response procedures and improve training.

## DARK WEB ANALYTICS

Connect data from vast sources throughout the open, deep and dark web including social media, blogs, forums, apps, news sites and so much more, to quickly develop singular leads into actionable intelligence. With Cobwebs, lead investigation is greatly expedited.

*"When Lorain County was looking for a county-wide automated vehicle location system I suggested that they contact Brite for their experience and expertise. Having previously worked with Brite, I was impressed with [their] expertise and professionalism and have enjoyed working with them. Brite's personnel are always responsive and stand behind their products and services.*

*I have, and will continue to recommend Brite for not only their AVLS system, but their line of MDT products as well."*

**- Chief Joseph K. Kucirek  
Amherst Police Department**

Brite's mission is to proactively protect organizations and communities through innovative technology solutions delivered by our talented team. Over the past 20 years, Brite has become a nationwide, industry-leading public safety technology integrator with solutions ranging from in-vehicle hardware to real time crime center technologies.

Brite's customer-focused team is committed to continuously advancing our knowledge and skills to ensure you receive the highest quality solutions and services to keep pace with evolving technology and demanding environments.

## BRITE'S PROCESS

### PRE-SALES

The Brite team is committed to helping you navigate the product selection process. We are passionate about making sure the solution meets your unique needs. By partnering with multiple industry-leading technology providers, Brite helps you streamline the evaluation process.

### DEPLOYMENT

Once a solution is selected, Brite's team of certified engineers and project managers are available to assist in each step of the deployment process. We assure the complete solution is fully deployed and the value of your investment is realized.

### ONGOING

Brite is committed to being a partner you can count on now and well into the future. Our programs support technology throughout its entire life-cycle. We continue to provide support and optimize solutions for longstanding ROI.

## BriteDeploy

### DEPLOYMENT SERVICES

BriteDeploy is a comprehensive service designed to take the unnecessary hassle and expense out of technology deployments. Brite understands that every department has particular deployment needs and expectations. Brite has created a highly customizable service rooted in a proven discovery method. Now, a department can receive the exact service required, when they require it.

#### SERVICES INCLUDE

- Project Management
- System Imaging
- Asset Tagging
- Physical Installation and Set-up
- Additional Software Load
- End User Training
- Site Assessment
- Start-up and Commissioning
- Legacy Data Conversion
- Hardware Disposal & Recycling
- Other Customized Services

## BriteStar

### MANAGED IT SERVICES

BriteStar for Public Safety combines people, process and leading technology to increase uptime, improve department security, reduce break/fix issues and offload day-to-day IT tasks. Maximize uptime and secure your department from the latest attacks - all at a fixed monthly fee.
